

Electrolysis

POST-CARE INSTRUCTIONS

Follow Us On [Tik Tok](#) and [Instagram](#)

IT'S COMMON TO EXPERIENCE SOME REDNESS AND SWELLING AFTER ELECTROLYSIS. APPLY A COLD COMPRESS OR ICE PACK WRAPPED IN A CLEAN CLOTH FOR 15-20 MINUTES TO REDUCE THESE SYMPTOMS.

- **Cleanliness:** Keep the treated area clean and dry and avoid touching it with dirty hands
- **Avoid Touching or Scratching:** Do not touch or scratch the treated area to avoid infection and scarring
- **Avoid Sun Exposure:** Stay out of direct sunlight, and use a broad-spectrum sunscreen with high SPF to protect the treated area
- **Avoid Hot Baths and Saunas:** Steer clear of hot baths, saunas, and hot tubs for a few days to prevent irritation
- **Avoid Makeup and Perfumes:** Refrain from using makeup, perfumes, or any scented products on the treated area for a few days
- **Loose Clothing:** Wear loose, breathable clothing to prevent friction and irritation

1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30	31				

FOR THE NEXT 2-3 DAYS AFTER THE TREATMENT, FOLLOW THESE RECOMMENDATIONS:

Apply hydrating gel or aloe gel to the treated area and allow it to dry

Apply Banocin or another antibiotic to the treated area twice a day. Use Banocin powder specifically for armpits, bikini area, and face.

Apply and reapply SPF every 2 hours

Starting on day 3, begin using a balancing moisturizer or another gentle moisturizer
